

1. UFT - Flashlights

on Tuesday, January 12, 2016

in the UFT Auditorium 1790 at 03 p.m.

(lecture 10 minutes and discussion 10 minutes)

1. **Prof. Lucio Colombi Ciacchi:** *"Chymotrypsin adsorption on oxide nanoparticles: simulations and experiments combined"*
2. **Frau Lyudmila Moskaleva, AG Bäumer:** *"Catalytic activity of nanoporous gold: insights from a computational DFT study"*
3. **Frau Wiebke Rastedt, AG Dringen:** *"Uptake of iron oxide nanoparticles in glioma cells"*
4. **Herr Steve Bemowski, AG Stolte:** *"Natural nanoparticle corona - are adsorbed biomolecules still biodegradable?"*

In the end of the meeting we will offer a cosy environment
for continuing the discussion.
